

iflybags mobile app backgrounder

Hate getting to the airport not knowing what your checked baggage fees will be for your upcoming flight? With iflybags, you can now get the information you need in the palm of your hand.

The iflybags app is the world's first baggage fee and allowance calculation app. Simply input your baggage and flight information and instantly be presented with an accurate, up-to-date baggage fee and/or allowance calculation.

iflybags is the most comprehensive baggage fee and allowance app available, with features like:

- Baggage Allowance Calculation
- Baggage Fee Calculation
- Checked Baggage Optimization (presents the most cost-efficient way to check bags)
- Frequent Flyer/Rewards/Credit Card Program input option
- Detailed rules and pricing from over 300 airlines (including interline)
- Data updates multiple times per day from subscription to most comprehensive and up-to-date airline industry baggage information available
- Class of Service input option

The iflybags mobile app uses the same patent-pending technology as the website to propose the best combination of checked bags for multiple travelers on a single itinerary, taking into account traveler frequent flyer status as well any airline-specific rules for checked bags or gear. This ensures you receive a specific fee quote with the lowest-cost way to check your bags. For example, if one traveler in a family of four has frequent flyer status and benefits from reduced checked baggage fees, iflybags will recommend which bags should be checked by which traveler to save the most money.
